UNITAR is pleased to welcome those interested to attend our webinar on the future of work. The webinar will briefly examine major shifts affecting work with a practical and engaging discussion of the human skills that are becoming increasingly important, including critical thinking, creativity, adaptability,

emotional intelligence and complex problem-solving.

The World Economic Forum (WEF)’s “The Future of Jobs Report 2025” projects that by 2030, 170 million jobs will be created, however 92 million jobs will be displaced. Now more than ever there is a growing need to develop data-related skills, focusing on AI governance, cybersecurity, and digital literacy, in an evolving labour market. As organisations increasingly rely on data and technology to inform decisions, there is also a need for professionals to understand how evidence can be effectively interpreted and applied.

In response to this need, UNITAR is launching an Online Professional Diploma in Skills for the Future and Employability, comprising six online workshops: three focused on technical skills and three on human-centred skills.

□□□□

This webinar aims to raise awareness of the changes shaping the future of work and the skills needed to navigate them. Participants will explore how critical thinking, creativity, adaptability, emotional intelligence and complex problem-solving can inform professional decisions and help them respond to an evolving labour market.

The webinar also introduces UNITAR’s new Online Professional Diploma in Skills for the Future and Employability, comprising six online workshops: three focused on technical skills and three on human-centred skills.

Participants interested in further developing their competencies are encouraged to consider enrolling in the Professional Diploma programme. To register please click here.

□□□□

After completing the webinar, participants should be able to:

- Understand the major trends and transformations shaping the future of work;
- Recognise the importance of key human skills, including critical thinking, creativity, adaptability, emotional intelligence and complex problem-solving;
- Identify practical ways to develop and apply these skills to navigate an evolving workplace.

□□□□□

The webinar will be 1 hour long, conducted via the platform Zoom and will be facilitated by an expert on the topic. The webinar will include a Q+A with the expert.

To register, please click here: Webinar Registration - Zoom

Participants interested in further developing their competencies are encouraged to consider enrolling in the Online Professional Diploma in Skills for the Future and Employability. To register please click here.

□□
