#### **ANTECEDENTES**

UNITAR developed the **2024-2025 PCB Webinar Series** to raise awareness and enhance global and national capacities towards the environmentally sound management of PCB.

This Webinar #4: **"PCBs in Open Applications"** explores key aspects of PCBs and other contaminants found in open applications, including their presence and management in construction materials and demolition waste. The session also

features a case study from Colombia, providing insights into practical management approaches. This event also serves to collect views and questions from participants to advance in the definition of topics for the following webinars of the series.
