Precio:	0,00 US\$
Correo Electrónico del Centro de Coordinación del Evento:	cisil.sohodol@bau.edu.tr
Colaboración:	CIFAL Istanbul, , Enerjisa

ANTECEDENTES

CIFAL Istanbul engaged with the Sustainable Energy-Based Tourism Implementation Center (SENTRUM) Project to highlight its role in promoting energy-efficient, environmentally responsible, and community-centered tourism models. The project supports Türkiye's transition toward sustainable tourism

through renewable energy integration, innovation, and local capacity-building.

OBJETIVOS DEL APRENDIZAJE

To advance awareness on sustainable energy solutions within the tourism sector. To encourage the adoption of low-carbon, resource-efficient tourism practices. To support local communities in developing environmentally responsible tourism infrastructures. To align with CIFAL Istanbul's mission to promote sustainable development through education, resilience, and innovation.

CONTENIDO Y ESTRUCTURA

The project framework includes training sessions, field demonstrations, and knowledge-sharing activities focusing on renewable energy systems, sustainable tourism models, and best practices for energy efficiency. It also showcases SENTRUM's implementation sites as examples of integrated green tourism strategies.

METODOLOGÍA

A combined approach of technical training, applied demonstration, and community-based engagement was utilized. This methodology ensures both theoretical understanding and practical competency in sustainable energy applications within tourism settings.

PÚBLICO OBJETIVO

Local tourism operators, community stakeholders, students.
