ANTECEDENTES

The aviation and airport management sector faces increasing challenges related to operational efficiency, safety, sustainability, and governance. In response to

these needs, CIFAL Mérida, in collaboration with ACI-LAC and UNITAR, organized the *Diplomado Internacional en Gestión Aeroportuaria* to strengthen the strategic and managerial capacities of senior airport professionals. The programme aligns with CIFAL's mandate to deliver high-quality, applied training that supports sustainable development and institutional leadership.

OBJETIVOS DEL EVENTO

- Understand key principles of modern airport management
- Apply strategic and operational tools to airport administration
- Analyze regulatory, operational, and organizational challenges in the aviation sector
- Strengthen leadership and management skills relevant to senior airport professionals

CONTENIDO Y ESTRUCTURA

The diploma programme is structured into thematic modules covering:

- Airport management and operations
- Strategic planning and governance
