METODOLOGÍA

1 - 1.5 hours webinars with expert speakers on the topic, with a Q and A Session in the end

PÚBLICO OBJETIVO

1. Public health professionals seeking to enhance their understanding of pharmaceutical systems, data management, and supply chain resilience.
2. Procurement and supply chain specialists working in health systems, NGOs, or international organizations who want to strengthen their technical and

strategic knowledge.

3. Government and Ministry of Health officials involved in pharmaceutical regulation, procurement, policy development, and health systems strengthening.
4. Professionals working in global health organizations, including UN agencies, donors, and development partners engaged in health programmes and supply chain operations.
5. Pharmaceutical and healthcare industry professionals interested in the broader policy, management, and sustainability dimensions of the pharmaceutical value chain.
6. Early-career professionals and recent graduates exploring career opportunities in global health, pharmaceutical management, and health supply chain management.
7. Students and researchers in fields such as public health, pharmacy, health economics, and health policy who are interested in practical insights from industry experts.
