ANTECEDENTES

The healthcare sector continues to face growing demands linked to public health challenges, healthcare accessibility, emergency preparedness, and the strengthening of health systems. Nurses and healthcare personnel play a critical role in ensuring quality healthcare delivery and resilient health services at

community and institutional levels.

This training programme aims to strengthen the professional capacities of nurses and healthcare-related employees through practical and context-based learning. The programme focuses on enhancing technical competencies, communication, patient care practices, and community-oriented healthcare approaches, while supporting broader efforts toward sustainable and resilient health systems.

OBJETIVOS DEL EVENTO

- Strengthen professional competencies of nurses and healthcare personnel.
- Enhance knowledge and practical skills related to healthcare delivery and patient care.
- Promote community-centred and context-based healthcare approaches.
- Improve communication and coordination within healthcare environments.
- Support continuous professional development in the healthcare sector.

OBJETIVOS DEL APRENDIZAJE

Participants will be able to:

- Identify key healthcare challenges within their professional context.
- Apply practical healthcare and patient-care approaches in institutional and community settings.
- Strengthen communication and collaboration within healthcare teams.
- Develop strategies to improve healthcare service delivery and patient outcomes.
- Integrate professional and ethical standards into healthcare practice.
