- ➔ **Dr Jon-Hans Coetzer**, Senior Programme Specialist, United Nations Institute for Training and Research (UNITAR)

*This webinar is an informative session; no certificates of any kind will be issued for this webinar.

CONTENIDO Y ESTRUCTURA

This launch webinar introduces the emerging concept of **epistemic rights** and examines how societies can respond to challenges posed by misinformation, disinformation, AI-generated content, and rapidly evolving digital ecosystems.

Participants will hear directly from leading experts in AI governance, digital policy, and peacebuilding and engage in an open discussion on the future of information integrity and global governance.

Key Themes

- The concept of epistemic rights and its policy relevance
- AI-mediated information environments and emerging risks
- Information integrity, democratic participation, and social trust
- AI governance and peacebuilding approaches
- Human rights and the future of digital governance

PÚBLICO OBJETIVO

UNITAR and the Glenlead Centre invite policymakers, practitioners, researchers, and members of the public to join an interactive webinar exploring how artificial intelligence, digital technologies, and information environments are reshaping peace, governance, and human rights.
