ANTECEDENTES

According to the UN World Health Organization (WHO), every four minutes, a child dies from a traffic accident. For adolescents aged 15 to 17, road traffic injuries are the leading cause of death worldwide, with boys accounting for nearly twice as many road traffic deaths as girls. And one third of these deaths are children in cars but two thirds outside cars. Reflecting on the urgency of this

issue, the UN General Assembly adopted a resolution on 10 April 2014 to improve road safety worldwide.

In view of the above, CIFAL Madrid carries out the third Edition of the most important Child Road Safety Congress in Andalusia with conferences, workshops and courses of Road Safety focus on Professionals to promote the use of Child Restrain System and how to use.

OBJETIVOS DEL EVENTO

By the end of the conference, participants should be able to:

- Avoid and prevent child road safety related risks
- Learn and identify the legal framework around Road Safety.
