

### CIFAL Malaga - Emeritus-Training session (Part 2)

#### Population

Date limite: 9 oct 2024

---

Type:	Course
Emplacement:	Athens, Greece
Date:	10 oct 2024
Durée:	12 Hours
Zone du programme:	Decentralize Cooperation Programme
Site internet:	<a href="https://cifalmalaga.org/web/">https://cifalmalaga.org/web/</a> <a href="https://emeritusproject.eu/work-packages/">https://emeritusproject.eu/work-packages/</a>
Prix:	0.00 \$US
Personne de référence de l'événement:	info@cifalmalaga.org
Partenariat:	CIFAL Malaga, Emeritus Consortium

---

#### ARRIÈRE PLAN

One of the core outcomes of EMERITUS will be the creation of a training program for Police Authorities & other security practitioners focused on environmental crime investigation. The training program is based on 3 sessions delivered in Italy, Greece and Spain respectively. The training program is intended to improve LEAs/BGs' specialized knowledge and practical experience in the use of

advanced technologies such as drones and satellite images for forensic purposes, in line with a tailored investigation protocol. As such, the training program (>2 simulations exercised, 40h total training) will complement the EMERITUS platform as a core tool to empower LEA/BGs to use the tool in operative conditions. Noteworthy, during the project implementation, the training program will be tested and refined with the representatives of the partner LEAs/BGs, whose acquired knowledge will be certified by CIFAL Malaga-UNITAR.

## OBJECTIFS DE L'ÉVÉNEMENT

The training program is intended to improve LEAs/BGs' specialized knowledge and practical experience in the use of advanced technologies such as drones and satellite images for forensic purposes, in line with a tailored investigation protocol.

## OBJECTIFS D'APPRENTISSAGE

EMERITUS aims to create a single-entry point platform for law enforcement authorities and border guards to improve investigative proof collection capabilities against environmental waste crimes. The focus of the project are the environmental crimes such as the discharge of substances into the air, water and soil as well as the shipping and trafficking of waste and hazardous materials that have enormous impacts on the climate, human health and the environment. However, these crimes are still considered highly profitable for criminals since most feature relatively low risks of detection and penalties for the perpetrators, given the complexity of preventing criminal wrongdoings and delivering distinct proofs to law courts to punish the authors.

## CONTENU ET STRUCTURE

### TIME SESSIONS SPEAKERS

- 08:30 – 9:00 Registration & Welcome Coffee
- 9:00-9:30 Presentation of the agenda and objectives of the second EMERITUS training session and training platform Overview of Training of Trainers methodologies Vittoria Luda/Trainer

- 9:30-10:00 Session 1 – Introduction to waste fires and relevant environmental, health and social impacts Vittoria Luda/Trainer
- 10:00-10:45 Session 2: Detection and Monitoring of waste fire and waste crime using remote sensing technologies and geo-profiling Vittoria Luda/Trainer
- 10:45 – 11:15 Coffee Break
- 11:15-12:15 Group work on a case study related to the identification of illegal waste sites and thermal sites Vittoria Luda/Trainer
- 12:15-13:00 Session 3: Risk assessment and annual enforcement plans Vittoria Luda/Trainer
- 13:00 –14:30 Lunch Break 14:30-15:15
- Session 4 : International and EU legal framework around nature protection and restoration Vittoria Luda/Trainer
- 15:15-15:30 TOT methodology discussion Vittoria Luda/Trainer
- 15:30 – 15:45 Coffee Break
- 15:45-16:45 SAFE Operational Training (Session I) (US LEA: GR BG, UC Tech Partner: KEMEA) Alessandro Castagnetti
- 16:45-17:00 Coffee Break
- 17:00-18:00 SAFE Operational Training (Session II) (US LEA: GR BG, UC Tech Partner: KEMEA) Alessandro Castagnetti
- 18:00-18:15 Wrap up of the course and next steps Closing of day and closing of the theoretical session Virtual room use Evaluation of the training Vittoria Luda/Trainer Alessandro Castagnetti Deborah Salafranca

## MÉTHODOLOGIE

EMERITUS aims to lay the foundations of a new generation of technological tools orchestrated via a single-entry point platform at the service of Law Enforcement Authorities (LEA) and Border Guards (BG) to improve detection and proof collection capabilities against waste-related environmental crimes. To do so, EMERITUS will create and implement a protocol for effective environmental crime investigation, Mainly combining innovative monitoring and analysis technologies with a complementary training program to foster LEAs and BGs' intelligence and investigation capabilities at both the national level and cross-border levels. The ambition of EMERITUS is to explore and demonstrate how these technologies and specialized training could improve the efficiency of environmental crime detection and intelligent risk profiling to optimize resources, reduce the risk for operators, and provide a deterrent for offenders.

## AUDIENCE VISÉE

Environmental agencies, government agencies, the police, tax authorities, law enforcement authorities, and border guards.
