Prix:	0.00 \$US
Personne de référence de l'événement:	CIFALHonolulu@chaminade.edu
Partenariat:	Minority Business Development Agency, CIFAL Honolulu, Chaminade University

ARRIÈRE PLAN

The 'Īnana Innovators Program is supported by the Minority Business Development Administration. Through a \$600,000 grant to Chaminade University, the MBDA is supporting student entrepreneurs to develop solution-oriented social, technological and business enterprises that focus on sustainability. The program is committed to diversity, equity and inclusion, empowering all students

to innovate and advance the United Nations' Sustainable Development Goals. This course offers undergraduate students from all majors a hands-on opportunity to learn about entrepreneurship, key concepts of sustainability, and the Sustainable Development Goals. Through interactions with guest speakers and industry experts, students will gain up-to-date, experiential knowledge and valuable insights. We collaborate with local businesses that are passionate about nurturing the next generation. These partnerships provide students the opportunity to develop unique, sustainable solutions that benefit businesses socially, environmentally, and economically. By the end of the course students receive a United Nations Certificate of Completion.

OBJECTIFS D'APPRENTISSAGE

1. Define sustainability and identify the four core components of sustainable system frameworks (human, economic, environmental and social components).
2. Relate the UN Sustainable Development Goals (SDG) to these core components.
3. Identify the association between SDG and the need for technology solutions and innovation in sustainability.
4. Define and utilize fundamental terminology and principles of business practice and entrepreneurship, with particular emphasis on sustainable business and social enterprises.
5. Apply sustainability business and entrepreneurship principles to analyze needs and gaps, and design technology-based solutions to sustainability challenges.
6. Evaluate case studies and examples of sustainability-focused entrepreneurship and innovation, particularly in island-based economies, analyzing their relationship to the Sustainability frameworks, SDG, and their integration of economic, ecological and equity components.
