CONTEXTE

Scabies can be diagnosed or highly suspected at the peripheral health level. Effective treatment exists for individuals affected, including the persons closely in touch with a patient, and the communities through mass drug administration. The aim of the course is to provide information about scabies to increase knowledge and skills of national and front-line health workers to address this disease.

OBJECTIFS DU COURS

- Understand the epidemiology of scabies;
- Describe the clinical aspects;
- Understand how the diagnosis is made;
- Explain how to treat scabies;
- Understand the socioeconomic impact; and
- Describe the public health interventions.

AUDIENCE CIBLE

Frontline health workers.
