### ARRIÈRE PLAN

This certificate programme aimed to equip participants with the knowledge and skills to design and implement socially responsible projects within the context of

digital transformation. With a focus on sustainability and ethical innovation, the programme addressed the increasing need for integrative approaches to solving social and environmental challenges in a rapidly digitizing world.

## OBJECTIFS DE L'ÉVÉNEMENT

Participants will be able to understand the relationship between digital transformation, sustainability, and social responsibility. Participants will be able to develop and manage impact-driven projects in various fields. Participants will be able to apply sustainable design principles to real-world challenges. Participants will be able to identify ethical considerations and stakeholder dynamics in digital project development. Participants will be able to demonstrate their learning through a final assessment and project evaluation.

## OBJECTIFS D'APPRENTISSAGE

Participants will be able to understand the relationship between digital transformation, sustainability, and social responsibility. Participants will be able to develop and manage impact-driven projects in various fields. Participants will be able to apply sustainable design principles to real-world challenges. Participants will be able to identify ethical considerations and stakeholder dynamics in digital project development. Participants will be able to demonstrate their learning through a final assessment and project evaluation.

## CONTENU ET STRUCTURE

The programme offered a multidisciplinary approach, covering core concepts such as sustainable innovation, digital ethics, stakeholder engagement, and project cycle management. Expert-led sessions combined theoretical input with practical project design exercises. Participants worked on group assignments and case studies focusing on real-life social and environmental issues. Sessions emphasized collaborative learning and digital problem-solving methods. The programme concluded with an online exam to assess participants' comprehension and ability to apply the acquired knowledge.

## MÉTHODOLOGIE

The programme was conducted online and included live expert sessions, interactive group work, and project-based assignments. A final online exam was held to evaluate participants' overall performance and knowledge retention.
