Digital tools, screening tools for UIS, waste mapping (United Circles)

Planet

Date limite: 5 Jun 2026

Type:	Webinar
Emplacement:	Web-based
Date:	9 Jun 2026
Durée:	2 Hours
Domaine du programme:	Environment, , Chemicals and Waste Management
Site internet:	https://cordis.europa.eu/project/id/101178798
Prix:	0.00 $US
Email du point focal de l'événement:	elena.dangelo@unitar.org
Partenariat:	Tech-Takeback UK

CONTEXTE

This webinar introduces participants to digital tools that support Urban-Industrial Symbiosis (UIS) and waste mapping within H4C hubs. Participants learn to use data-sharing platforms, and tools to identify and evaluate symbiosis opportunities. The module covers mapping, scenario simulation, visualization, and prioritization tools, helping participants understand tool interoperability,

strengths, limitations, and practical applications in urban-industrial contexts.

OBJECTIFS DU COURS

- Understand the role and principles of digital tools in UIS
- Recognize different types of digital tools (mapping, assessment, simulation, visualization)
- Identify benefits for hubs and urban-industrial systems
- Use digital symbiosis and waste mapping tools effectively
- Simulate scenarios
- Apply scoring matrices to prioritize UIS opportunities
- Integrate digital tools into hub operations and identify next steps for local applications

AUDIENCE CIBLE

United Circles stakeholders, Hubs members and external stakeholders
