

CTBTO Series on Preventing and Monitoring Nuclear Tests

Type:	Seminar
Emplacement:	New York City , United States of America
Date:	8 juin 2018 to 11 juin 2018 (À confirmer)
Durée:	4 Days
Zone du programme:	Corporate Social Responsibility, , Peace Security and Diplomacy, , Multilateral Diplomacy, , International Law
Site internet:	http://unitar.org/
Prix:	0.00 \$US
Personne de référence de l'événement:	pelayo.ALVAREZ@unitar.org
Numéro de téléphone de la personne de référence pour cet évènement:	2129639196
Partenariat: Organization	Comprehensive Nuclear-Test-Ban Treaty

CONTEXTE

The Preparatory Commission for the CTBT Organization (CTBTO) utilizes a unique and comprehensive verification regime consisting of an International Monitoring

System (IMS) (applying seismic, hydroacoustic, infrasound, radionuclide technologies), with stations worldwide, to ensure that no nuclear explosion goes undetected. As a result, the CTBT makes it difficult for countries to either develop nuclear bombs for the first time, or to manufacture more powerful bombs. It also prevents the huge damage caused by radioactivity from nuclear explosions to humans, animals, and plants. On-site inspections can also be dispatched to the area of a suspected nuclear explosion, as indicated by the IMS.

The Preparatory Commission is now working to persuade the remaining 44 specific nuclear technology holder countries to both sign and ratify, as the CTBT has yet to come into force.

OBJECTIFS DU COURS

- Give a general overview of the ongoing mission of CTBT and would further educate members of the UN community on the future of the treaty and the services that CTBT currently offers;
- Provide a hands-on approach that will expose participants to the verification and training procedures used in order to maintain an effective International Monitoring System.
