ARRIÈRE PLAN

The information and communication technology (ICT) industry has evolved enormously over the last few decades. Also, ICTs are considered as a growth engine to foster economic growth across the globe. In addition, the ICT convergence market has been expanding significantly as more and more businesses utilize ICTs not only in typical ICT industries but also in other

innovative industries, including agriculture, city, waste management and tourism.

In this regard, there is a growing need for comprehensive understanding on the ICT trends, good practices, policies and prosperity on the ICT industry, which can be used as the foundation for developing government policies relating to ICTs and as a source of reference for the private sector in promoting ICT-based innovation in their industries.

OBJECTIFS DE L'ÉVÉNEMENT

The workshop aims to build capacity of participants on ICT sector, whilst promoting awareness and recognition on the importance of promoting ICT-based Innovative industries. For the capacity building, this event will:

- Provide an opportunity for the local governments and cities in the Asia-Pacific region to exchange ICT policies and best practices relevant to fostering ICT-based innovative industries through city-to-city cooperation;
- Promote a learning atmosphere between cities and establish a strong network which can be utilized after the workshop;
- Offer a venue for knowledge sharing and discussion and motivate participants to discuss the current status and issues of ICT industry in their regions.
