ARRIÈRE PLAN

At CIFAL Madrid we think that training is essential for achieving the goal of reducing accidents on the streets and roads. That is why we have proposed a far-reaching set of online and classroom training courses targeted at road safety experts and professionals.

Ranging from courses of 3 teaching hours to a university postgraduate qualification as Expert, training at CIFAL Madrid will build students' capacities at different levels, leading to a certificate from the Centre and UNITAR, the UN Institute for Training and Research.

OBJECTIFS DE L'ÉVÉNEMENT

The Private Degree of Expert in Road Safety Management and Administration has been created to offer the highest level of qualifications to experts and professionals in accident prevention, creating a hub in which experts can exchange knowledge.

OBJECTIFS D'APPRENTISSAGE

At the end of the course, participants will be able to:

- Taking the lead and creating models in innovative quality training projects, promoting communication and knowledge transfer.
- Designing solutions to real situations at different country realities

CONTENU ET STRUCTURE

Classroom training consists of three sessions per day, from Monday to Thursday, with classes of 2 hours each one. At the end of each day, there will be a time for Answer & Questions. In addition to the theoretical classes and practical visits, the educational development of the course is complemented by practical projects.

MÉTHODOLOGIE

CIFAL Madrid-RACE provides users with a catalogue of online courses. The courses are designed to develop professional training through the study of specific questions relating to traffic and road safety.

The courses use multimedia resources and visual elements to ensure easy understanding, and may be taken, stopped or resumed at any time. Once the course is completed, students will have the knowledge needed to assess the risk elements and factors present in road accidents, preventive driving techniques and vulnerable drivers, with an emphasis on vehicles, infrastructures and the human factor as key elements of road safety.

Once the tests have been passed and the course is over, users will be presented with a Diploma accrediting the course with the seal of CIFAL Madrid, RACE and UNITAR

AUDIENCE VISÉE

Road safety technicians and professionals responsible for traffic and occupational risk prevention, insurers, automobile clubs, research centres and users in general who want to focus their professional development on the field of road safety.
