CONTEXTE

*This course is funded by the **Arab Gulf Development Programme (AGFUND)**, a regional organization based in Riyadh, Saudi Arabia. AGFUND was established in 1980 upon the initiative of His Royal Highness, Prince Talal Bin Abdul Aziz Al Saud with the support of leaders of the Gulf Cooperation Council Countries: United Arab Emirates, Kingdom of Bahrain, Kingdom of Saudi Arabia, State of Qatar, Sultanate of Oman and the State of Kuwait. AGFUND works mainly in the*

field of development and growth at the international level through an effective partnership with the United Nations Organization, with regional and national development organizations, with public institutions, with the private sector, as well as with organizations of the civil society. | http://agfund.org

This course is designed for officials and other participants who are interested in learning more about the structuring and negotiating of financial transactions between developing/emerging countries and their external sources of funds. Scarcity of external funds and development assistance as well as greater conditionality and a plethora of loan documentation require government officials and financial negotiators to better understand international financial markets and financial flows as well as know their lenders better. This course will allow the participant to understand the global negotiating environment, prepare for multilateral, bilateral and commercial negotiation situations as well as weigh the relative advantages and disadvantages of a particular financial transaction.

OBJECTIFS D'APPRENTISSAGE

At the end of the course, the participants should be able to:

- Demonstrate familiarity with the global negotiating environment;
- Describe the main characteristics of international financial markets and financial flows;
- Recognize which source of funds caters to a particular purpose; and
- Appraise the contribution of lawyers in financial transactions.
