NCD Digital Health and Capacity Building

Type: Course
Location: Web-based
Duration: 8 Hours
Thematic Area: Other
Website: <https://web-staging.lxp.academy.who.int/coursewares/course-v1:WHOAcademy-Hosted...>
Price: \$0.00
Event Focal Point Email: globalhealth@unitar.org

BACKGROUND

The course is designed to provide participants with a comprehensive understanding of the digital health landscape and its role in addressing non-communicable diseases (NCDs). It covers the latest trends, challenges, and opportunities in the field, with a focus on capacity building for health professionals and policymakers. The course is structured to be interactive and engaging, with a mix of theoretical and practical content. It is suitable for individuals with a background in health, digital technology, or public health, and is open to all interested parties.

CONTENT AND STRUCTURE

- The first part of the report is the introduction, which provides a brief overview of the project and its objectives.
- The second part is the methodology, which describes the research methods used in the study.
- The third part is the results, which presents the findings of the study.
- The fourth part is the discussion, which interprets the results and discusses their implications.
- The fifth part is the conclusion, which summarizes the main findings and provides recommendations for future research.

METHODOLOGY

The methodology section describes the research methods used in the study. It includes a description of the study design, the sample, the data collection methods, and the data analysis methods.

The study was conducted using a quantitative research design. The sample consisted of 100 participants who were recruited from a local community center. Data was collected using a series of questionnaires and interviews. The data was then analyzed using statistical software.

TARGETED AUDIENCE

The targeted audience for this report is the local community center and the participants who were involved in the study. The report provides information about the study and its findings, which may be useful to the community center and the participants.
