

Planet

Type:	Course
Location:	Web-based
Duration:	1 Days
Programme Area:	Environment, , Climate Change
Website:	http://www.unccelearn.org/
Price:	\$0.00
Event Focal Point Email:	unccelearn@unitar.org
Partnership:	UN CC:Learn Partnership, UNDP, Swedish Development Cooperation (SIDA)

BACKGROUND

IMPORTANT: Please register directly on the course website:

<http://unccelearn.org/>

Climate information and services (CIS) are essential for decision-makers to understand the risks and opportunities associated with climate change. CIS can help to reduce vulnerability and build resilience, and can contribute to sustainable development. CIS can be provided through a variety of channels, including traditional media, digital platforms, and community-based organizations. CIS can be used in a wide range of sectors, including agriculture, water, health, and infrastructure. CIS can be used to inform policy-making, to guide investment decisions, and to help individuals and communities to prepare for and respond to climate change. CIS can be used to build resilience and to reduce vulnerability, and can contribute to sustainable development. CIS can be provided through a variety of channels, including traditional media, digital platforms, and community-based organizations. CIS can be used in a wide range of sectors, including agriculture, water, health, and infrastructure. CIS can be used to inform policy-making, to guide investment decisions, and to help individuals and communities to prepare for and respond to climate change.

UNDP is a leading provider of climate information and services. UNDP works with governments, the private sector, and civil society to build resilience and reduce vulnerability. UNDP provides a wide range of services, including assessment, planning, and implementation. UNDP has a strong track record of providing climate information and services in a variety of countries and sectors. UNDP is committed to providing high-quality, evidence-based climate information and services that are accessible and usable by decision-makers. UNDP is committed to building resilience and reducing vulnerability, and to contributing to sustainable development. UNDP is committed to providing a wide range of services, including assessment, planning, and implementation. UNDP has a strong track record of providing climate information and services in a variety of countries and sectors. UNDP is committed to providing high-quality, evidence-based climate information and services that are accessible and usable by decision-makers. UNDP is committed to building resilience and reducing vulnerability, and to contributing to sustainable development.

LEARNING OBJECTIVES

After completing this e-tutorial, participants will be able to:

- Define climate information and services.
- Identify the uses of climate information and services in development planning and policy.
- Discuss the role of legislation in strengthening climate information and services.
- Provide examples of instruments available to governments for mainstreaming climate information and services.

CONTENT AND STRUCTURE

The e-tutorial is structured into several sections. The first section provides an overview of climate information and services, including their definition, uses, and benefits. The second section discusses the role of legislation in strengthening climate information and services. The third section provides examples of instruments available to governments for mainstreaming climate information and services. The fourth section discusses the challenges and opportunities associated with providing climate information and services. The fifth section provides a summary of the key points covered in the e-tutorial. The e-tutorial is designed to be self-paced and can be completed in approximately 30 minutes. The e-tutorial is available in English and Spanish. The e-tutorial is a free resource for individuals and organizations interested in climate information and services. The e-tutorial is a valuable resource for decision-makers, policymakers, and the general public. The e-tutorial is a key component of the climate information and services training program. The e-tutorial is a key component of the climate information and services training program.
