International Aviation CO2 Emissions Reduction: States' Action Plans

Planet

Type:	Course
Location:	Web-based
Duration:	1 Days
Thematic Area:	Environment, , Climate Change, , Environmental Governance and Law
Website:	http://www.unccelearn.org
Price:	$0.00
Event Focal Point Email:	uncclearn@unitar.org
Partnership:	ICAO

BACKGROUND

This course aims to build an understanding of the importance of States' Action Plans to address CO2 emissions from the international aviation sector. By establishing close cooperation among all stakeholders, it will help facilitate the selection, adoption and implementation of the most appropriate measures to reduce the CO2 emissions.

The tutorial has been developed by the United Nations Institute for Training and Research (UNITAR) in collaboration with the International Civil Aviation

Organization (ICAO).

Action Plans will support the improvement of efficiency and thereby contribute to the global environmental aspirational goals established by the ICAO Assembly.

The first module is available publicly here: http://unccelearn.org/

EVENT OBJECTIVES

At the end of the tutorial, a participant is able to:

1. Define the activities related to the development of a State Action Plan
2. Explain why it is important to develop a State Action Plan
3. Describe the main information which should be included in a State Action Plan
