Integrated Planning for Climate Change and Biodiversity - Autumn 2021

Multilateral Diplomacy

Deadline: 9 Jul 2021

Type:	Course
Location:	Web-based
Date:	5 Jul 2021 to 4 Oct 2021
Duration:	3 Months
Thematic Area:	Biodiversity, , Climate Change, , Multilateral Diplomacy, , International Law
Website:	https://unitar.org/mdp
Price:	$0.00
Event Focal Point Email:	info.ilp@unitar.org
Partnership:	IUCN

BACKGROUND

Land-use planning frameworks have traditionally focused on developing settlements and related infrastructures with limited consideration of biodiversity conservation and climate adaptation and mitigation requirements. It is underused in maximizing win-win solutions for human well-being and sustainability under the

threat of global climate change. Awareness and knowledge of land-use planning as a tool for biodiversity and climate resilience are to be raised and strengthened among relevant actors at various levels.

EVENT OBJECTIVES

The overall goal of this course is to increase the capacity of key stakeholders to optimize planning to support biodiversity and climate change adaptation objectives, including through the effective engagement of protected area systems.

LEARNING OBJECTIVES

Upon completion of the course, you will be able to:

- Identify the interaction of climate change and biodiversity with land-use plans;
- Identify principles and concepts of land-use planning for incorporating biodiversity and climate change into spatial development plans;
- Explain the role played by protected areas and village planning;
- Explain policies and laws across sectors;
- Identify relevant stakeholders across institutions;
- Identify stakeholder positioning in the planning and decision making process;
- Explain how stakeholders can engage in planning and decision making process:
- Identify the different layers of governance involved in planning across village, district, regional and national levels;
- Identify ways to collaborate across national borders.

CONTENT AND STRUCTURE

The course is divided into four modules:

Module 1: “Connecting land-use, climate change and biodiversity” covering:

The spatial planning – biodiversity – climate change nexus

Principles and concepts of land-use planning for incorporating biodiversity and climate change into spatial developments plans

The role played by protected areas in village planning

Module 2: “Inter-sectoral and inter-institutional collaboration” covering:

Introduction to international laws and policies

Cross-sector approach to laws and policies concerning integrated land use planning

Identification of all relevant stakeholders in integrated land use planning

Module 3: “Public participation in decision-making” covering:

Positioning stakeholders in the planning and decision making process

Stakeholder engagement in the planning and decision-making process

Module 4: “Regional planning for harmonization and connectivity”

Multilevel and multi-scale governance

Transboundary governance

METHODOLOGY

This self-paced course promotes a dynamic approach through lessons and multi media materials, stimulating critical thinking. It provides flexibility, since you will be able to complete the course at your own pace and time. Contents and activities are practice-oriented and under a self-learning approach. You will also learn through practical example, scenarios and knowledge assessments.

TARGETED AUDIENCE

Government officials, representatives of international organizations and NGO, protected areas staff, academics and private sector professionals with an interest

in development, climate change, and nature conservation.

ADDITIONAL INFORMATION

Once you meet the passing criteria for the course you will receive a Certificate of Completion jointly delivered by UNITAR and IUCN.

Kindly be advised that you should have access to an internet connection to complete the course.
