Artificial Intelligence plays a pivotal role in the evolving field of education, transforming how knowledge is imparted, acquired, and applied. Understanding AI and its impact is crucial for educators, students, and policymakers, as it enables them to engage with AI-driven tools and platforms effectively. This knowledge helps stakeholders leverage AI to enhance personalized learning, streamline administrative processes, and foster innovative teaching methods. At the same time, it ensures an awareness of the challenges and ethical

considerations associated with AI in educational settings. Such understanding is essential for creating policies and frameworks that ensure AI is integrated into education in a way that benefits learners and respects their rights.

The proposed training programme will be conducted in English.

The time of the Free online Training on Artificial Intelligence and Education for Geneva-based Permanent Missions and UN Staff is:

- **Wednesday 27th November, 2 - 4 PM CET**

UNITAR trainings are designed to be highly interactive and participatory. The briefing will utilize a variety of pedagogical tools to enable participants to acquire a thorough knowledge and understanding of the substantive issues at hand.

The training is aimed at **officials of Permanent Missions and UN personnel**, for whom it is free of charge.

Note: Participation is on a first-come, first-served basis, and registration will be closed once the maximum number of participants has been reached.

Kindly ensure to use your full name in your application, as well as to specify your position within the Permanent Mission of your respective country.
