Location :	Malatya, Türkiye
Date :	11 11 2025
Duration :	3 Hours
Programme :	Decentralize Cooperation Programme
Registration Link :	https://cifalistanbul.org/
Cost :	US\$0.00
Contact email:	cisil.sohodol@bau.edu.tr
Organized by :	CIFAL Istanbul, Bahçeşehir University, Malatya Metropolitan Municipality, Bright Futures Foundation

The event was organized in Battalgazi, Malatya, to raise awareness about environmental sustainability and responsible waste management. The event aimed to educate elementary and middle school students and teachers on the importance of zero waste practices and recycling. By providing both theoretical

knowledge and hands-on experiences, the workshop encouraged participants to adopt environmentally friendly habits and contribute to a sustainable future.

Increase awareness of zero waste and recycling among students and educators. Provide practical knowledge and skills to help participants integrate sustainability into their daily lives. Encourage active participation in environmental conservation efforts. Strengthen community engagement in sustainability initiatives.

Increase awareness of zero waste and recycling among students and educators. Provide practical knowledge and skills to help participants integrate sustainability into their daily lives. Encourage active participation in environmental conservation efforts. Strengthen community engagement in sustainability initiatives.

The event featured a structured program that balanced education with engagement, making environmental awareness both informative and enjoyable. Sessions covered zero waste principles, recycling processes, and sustainable living habits, with interactive discussions to reinforce learning. The hands-on activities allowed participants to practice sorting waste correctly, explore creative recycling methods, and brainstorm ways to minimize environmental impact in their daily lives. By integrating both theoretical and practical approaches, the workshop ensured that attendees could internalize and apply sustainability concepts effectively.

The methodology of the event was based on a workshop format, integrating interactive discussions and hands-on activities.

Elementary and middle school students, parents, teachers in the earthquake zone.
