CIFAL Istanbul cooperated with the Sustainability Training held in cooperation with the Gaziantep Chamber of Commerce and Enerjisa Enerji, an initiative designed to strengthen corporate sustainability capacities and promote responsible energy practices. The programme emphasized the importance of integrating sustainable development principles into business operations.

To enhance awareness of sustainability frameworks and energy efficiency practices. To support businesses in aligning their strategies with environmental and social responsibility goals. To provide practical guidance on implementing sustainable energy solutions. To promote multi-stakeholder collaboration for advancing regional sustainability efforts.

The training covered key sustainability concepts, energy management strategies, regulatory developments, and practical tools for reducing environmental impact. Participants examined case studies and discussed approaches for integrating sustainability into organizational decision-making.

A combination of expert-led presentations, interactive discussions, and applied learning modules was used to ensure comprehensive knowledge transfer. This format enabled participants to engage with real-world examples and identify actionable steps for improving sustainability performance..

Business representatives, sustainability officers, energy managers.
