□□□□

The World Economic Forum (WEF)’s “The Future of Jobs Report 2025” projects that 170 million jobs will be created by 2030, while 92 million will be displaced. As artificial intelligence becomes increasingly embedded in professional environments, practitioners in multilateral contexts need to understand not only

how these technologies can support their work, but also how they should be governed and used responsibly.

In line with the Pact for the Future and UN 2.0, this e-workshop examines how AI and digital technologies are reshaping institutions and governance. It will help participants understand the opportunities these technologies create alongside key governance considerations. The workshop will strengthen participants' ability to engage confidently with AI-related governance questions in a rapidly changing digital landscape.

□□□□

This workshop aims to strengthen participants’ capacity to understand how AI and digital technologies are transforming institutions and how they can be governed responsibly. By examining both their professional applications and wider governance implications, participants will be better equipped to make informed decisions and remain effective in an evolving workplace.

This workshop is one of the micro-credentials offered in UNITAR's Online Professional Diploma in Skills for the Future and Employability, comprising six online workshops: three focused on technical skills and three on human-centred skills.

Participants interested in further developing their competencies are encouraged to consider enrolling in the Professional Diploma programme. To register please click here.

□□□□

After completing the e-workshop, participants should be able to: .

- Explain how AI and digital transformation are influencing multilateral practice and institutional decision-making;
- Identify appropriate ways in which selected AI and digital tools could support research and programme-related work;
- Reflect on how AI and digital tools could be integrated responsibly into their professional practice;
- Recognise key governance challenges associated with AI.

□□□□□

The e-workshop will be 3 hours long, conducted via the platform Zoom and will be facilitated by an expert on the topic. The material presented in the e-workshop will be interactive and assignments will be given for participants to further advance their knowledge.

Upon successful completion of the e-workshop, participants will be eligible to receive a certificate after successful completion.

Participants interested in further developing their competencies are encouraged to consider enrolling in the Online Professional Diploma in Skills for the Future and Employability. To register please click here.

□□

UNITAR courses are designed to be highly interactive and participatory. Activities will include direct access to understand and discuss the topics at hand with a top expert in the respective field as well as opportunities to exchange knowledge will fellow participants. All activities will be conducted online.

The workshop may consist of the following components:

- Compulsory and optional reading material, intended to teach the fundamentals of the topic;
- Multimedia and external links to additional books, articles, documents, and websites related to the lessons;
- Quizzes and case studies;
- Community Discussion Boards;
- Learning journal entries corresponding to each e-workshop;
- Collaborative learning tools such as simulation exercises.

Participants will have access to the UNITAR e-Learning platform, where they will be able to interact with each other and their instructor via the discussion boards, view course materials, videos, and recordings as well as relevant additional resources.

□□□□

This workshop is designed for government officials, diplomats, private sector specialists, practitioners in the international arena, academics, students or any interested participants who are seeking to adapt to evolving global dynamics and strengthen employability through agility, innovation and data-driven strategic thinking.

□□□□

Kindly note that the programme will only take place if the minimum number of participants has been reached.

If you register for the Online Professional Diploma in Skills for the Future and Employability you are not required to register for the individual micro-credentials.

UNITAR is a non-accrediting institution, and as such, diplomas that may be awarded by UNITAR carry no accreditation recognition.

Admission requirements

There are no specific admission requirements. Participants who wish to enrol in individual micro-credentials without being awarded the Professional Diploma can still do so.
