📌

As sustainability reporting requirements, ESG frameworks, and European sustainability regulations continue to evolve, organizations and public institutions increasingly require practical knowledge, collaborative learning opportunities, and tools to support implementation. Strengthening capacities related to sustainable governance, reporting, circular economy, climate action, and responsible procurement is essential for advancing the Sustainable Development Goals (SDGs) and supporting long-term institutional transformation.

This SDG Workshop allows participants to use the 2030 Agenda and the SDGs as a holistic framework for their organisations plans and sustainability strategies.

The training can be in Dutch, English or French.

The training can be delivered at your location (in-house) or online.

The duration is tailored to your preferences. The workshop typically lasts 2-3 hours.

LEARNING OBJECTIVES

- Understand the integrated and indivisible nature of the SDGs and how they relate to your organisation
- Learn how to use the SDG Spiderweb as a self-assessment tool for your organisation, its policies, projects and/or other initiatives
- Discover how your organisation negatively and/or positively impacts the SDGs and be better equipped to prioritise actions ahead

- Introduction to Agenda 2030 and the Sustainable Development Goals
- Interactive brainstorm sessions with our organisation-specific SDG-circle
- Reflection of best practices and challenges in the light of the 5 P's and the 17 SDGs

Open to all actors in society: businesses, public institutions, academia, non-profit, civil society etc.
